### THE WEATHER AS A FACTOR IN FARMING

(Written Specially for The Bulletin.) failed in his observation. It has Probably no other subject on earth is so much talked about as the weather. Certainly this is true among farmers and other "out-door" folk.

We have the subject on earth proven true innumerable times. Why shouldn't it?

Like everything else there is a cause for the swallows' llying low. It is

Ing to be for the season, we could know what to plant and when to plant the Perhaps nite as important, we could know what not to plant.

In mry particular neck o' woods we seldom have two causeculve seasons alke. As a tesult, crops which do firely one summer often prove fallures the next summer though given practically identical treatment.

When I am putting in my garden of them will fall, commorcially. In It is not believed that the countdent experiments for them will fall, commorcially. In It is not believed that the people of them will fall, commorcially. In It is not believed that the people of them will fall, commorcially. In It is not believed that the people of them will fall, commorcially. In It is not believed that the people of them will fall, commorcially. In It is not believed that the people of them will fall commorcially. In It is not believed that the people of them will fall commorcially. In It is not believed that the people of the mean of them can. Therefore we watch the same wallows who live on them can. Therefore we watch the same wallows who live on them can the air is heavy.

So will a success in 15 may prove a fine of it is not believed that the people of the weather may be the same.

For instance, last year my onlon crop was a complete failure. This summer, on ground naturally northers, item highly fertilized and much less thoroughly cultivated I am getting one of the pest strops I ever had.

Another of our local indication in some them foundation in some that a strength on reflection and they are not them, will be found and they to continue the week, at a transition and the week in the week in the week in the wall and in the week. It is not believed that the people of me New London want their gustriant the wall provided the mean them the difference of the force and have urged that the pople of the force in the wall and the out-doors man who wants to the force and have urged that the out-doors man who wants to the pay is not raised. They now receive less trays I ever had.

Another of our

bulk and poor in quality.

Liest spring my fecture was scrawny and torist, inclined to run to zeed before acading. This spring the same fore acading to be and hard hard heads high lard and brittle, and showed almost no tendency to was stall a little cold, no matter wave of late July struck us.

Liest year not be and cared for an independent of the policy within twenty-four peak did quits by within twenty-four hours and before her for a surface of the policy of the people. The planed our corn just as soon as we of poor quality. This summer it is simply bunkarm.

Last year both corn and tomatoes

low over the mendows expect a storm, and, when their conduct is induced only twice in forty years has this by such causes, it naturally might be

expected to serve, in some degree, to suggest warnings to us of the weather gunshot of the actual weather twenty-such causes will naturally bring forth.

Samplings they fall middled us Sometimes they fail, mislead us,

an't be absolutely sure about them.

Well, we can't be sure about the bservers at their command, have forth! falled just about seven times out of

nyway. My own experience of recent years in actual out-door conditions leads me to put a good deal more confidence in what the swallows and the robins and the cat-birds and the hoopoes and vernment 'weather predictions, and the cat-birds and the hoopoes and the silder and the silder and the silder tell me than in what the training of thousands of skilled government weather bureau puts

them. But I never do. That which is a real success in '15 may prove a finsco in '16, though everything except the weather may be the same.

For instance, last year my onion crop was a complete failure. This summer, on ground naturally no richer, less highly fertilized and much less thoroughly cultivated. I am getting one of the pest crops I eyer had.

Last year my gunach was simply a winder, big, fat, succeient. This spring I was less than half a crop in bulk and poor in quality.

Last years my glettuce was scrawny like in poor in quality.

Last spring my lettuce was scrawny

well. This provides the control of the finder of the pools of the pool

disgusting by ear and stary at night. The longer they hang around town the holder they and have become really insulting. Most of these fellows really insulting. Most of these fellows and dirty, some scentily attired in rags and using feed sacks for costs, to work for the New York, New Haven and Hartford railroad in the big coal piles at Midway.

The majority of them are too key or are not able to work and the employer has no use for them. They have no has no use for them. They have no has no use for them.

The majority of them are too lazy or are not able to work and the employer has no use for them. They have no means to pay their fares back to the south, so they come to New London thing to turn up and in the meantime

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh. Catarrh being greatly influenced by constitutional conditions, requires constitutional treatment. Hall's Catarrh Cure is taken internally and acts through the blood on the mucous surfaces of the system, thereby destroying the foundation of the disease, giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in the curative powers of Hall's Catarrh Cure that they offer One Hundred Dollars for any case that it fails to cure Send for list of testimonials.

Address F. J. CHBNEY & CO., Toledo, Ohio. Sold by all druggists, 75c.

make themselves obnoxious to the people as a whole, even to the decent people of their own race. It is about time something was done to rid New London of this growing nuisance and there should be an end to the pro-miscous dumping of such trash into the community.

It is perhaps more than passing strange, politically, with the state conventions nearing the holding period, that New London has not come to the front with a candidate for almost every office on both state tickets, the candidates not necessarily being New Londoners, but handled by politicians of this city. So far as known there are no candidate boomers just at this moment in New London, but no one knows what may happen in that fine between thow and the conventions. Some one, however, whose identity is not known and who evidently is not familiar with the political game, has started a little boom for State Attorney Hadlai A. Holl, as democratic candidate for governor, and in support of the boomlet goes on and tells what the major has done for his state and content to the state of the boomlet goes on and tells what the major has done for his state and content to the state of the boomlet goes on and tells what the major has done for his state. fications of the major.

But who said Major Hull was a democrat? He may be a very good man for governor, but democrats, like republicans, want dyed-in-the-wool man for governor, or republicans, wint dyed-in-the-wool men of their respective parties to head the state ticket. It may be a year ago, but it does not seem so long, since Major Huil headed a procession of republicans in New London and which would serve as circumstantial evidence that he was a republican. He have registered as a republican in the days that have gone. By put-ting the past and the present to-gether, the question of the Major's democracy might possible be a matter of mild discussion. But it might be explained that Major Hull is still a democrat, but not a Mahan democrat.
